This thread discusses the Content article: Paving the Way

Big congratulations to Mike :) We also turned up the boost on his car last night and put a street tune on it. Shortly there after mopped the floor with an '03 Cobra like it was a Civic.

I had it at 12psi when I took the Cobra. Supposedly it was putting down just above 400rwhp, which goes to show the true benefits of having a turbo setup over a supercharger :)
