
exterior Door handle replacements

Posted by ItchiBitchi4G64GS - 2009/02/18 08:16

My door handel was yanked hard, someone was stupid enough to try and break into my car with no avail. However, they did manage to pull out a screw from the inside of the door handle. Now the handle frame is very loose. I need to replace this and I have found the parts online for like 16 bucks. I need some help in getting the door cover off without destroying anything. Thanks.
