
Header installment on 2.4L eclipse 2001

Posted by clay816 - 2007/04/02 14:32

Hello everyone just wondering how I take off stock header, I can get 7 out of the 9 bolts off the manifold but theres 2 if when you pop the hood and your looking down at the engine the the far 2 bolts on the left I dont know how to get to them. Just wondering if anyone knew how or could give me some advice thanks.

Get yourself some of those ratcheting wrenches, they are undoubtedly the best hand tools I've ever had the pleasure of using.

Link in another standard wrench at the end of it and you will have enough leverage.
