
battery relocation install

Posted by dsmstratus - 2008/02/10 05:46

I have a 2004 Stratus R/T and I'm trying to route the battery to the trunk. I was wondering if anyone with a stratus who did this change can help me with some advice and some pictures on there install. Thanks

As with an amp install, you just put a hole in your firewall and run the cable through your door sill to the trunk.
