
3.5 swap

Posted by DistantZeal - 2009/03/19 10:08

Hey guys, I just bought a 2001 Eclipse GT and this summer I plan on swapping the 3.0 with the 3.5 from a Diamante. I was wondering if I have to change the wiring harness if I do this, because if I do than i'm just going to rebuild the engine I have in it now because redoing all the wiring is not worth my time. Thanks a alot guys, it's much appreciated.;
