**GROUP 34**

**REAR SUSPENSION**

**CONTENTS**

**GENERAL DESCRIPTION..... 34-2**

**GENERAL DESCRIPTION**

M2340000100494

Rear suspension has low-mount multi-link type suspension with integrated double cross member which has high rigidity for stability.

**FEATURES****SHOCK ABSORBER**

Improved handling and noise isolation by changing body side attaching point of shock absorber from upper side of wheelhouse to high rigidity area of side member.

**SUSPENSION RIGIDITY**

Improved handling stability by keeping suspension rigidity by wider arm span and optimizing bush tuning. Also improved ride comfort by optimizing bigger trailing arm tuning. Handling and ride comfort have been improved by adopting the high rigidity and low friction pillow ball bushing and ball joint at the lower arm and toe control arm to knuckle connecting points.

**STABILIZER**

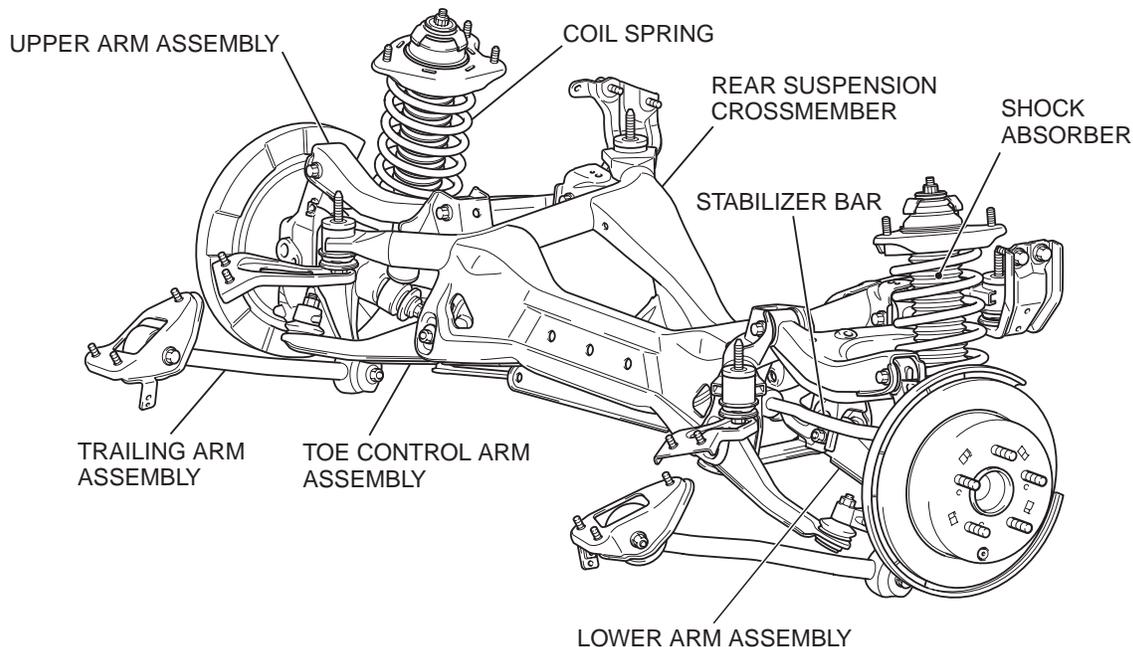

Improved the response by adopting the ball joint type linkage.

**CROSSMEMBER**

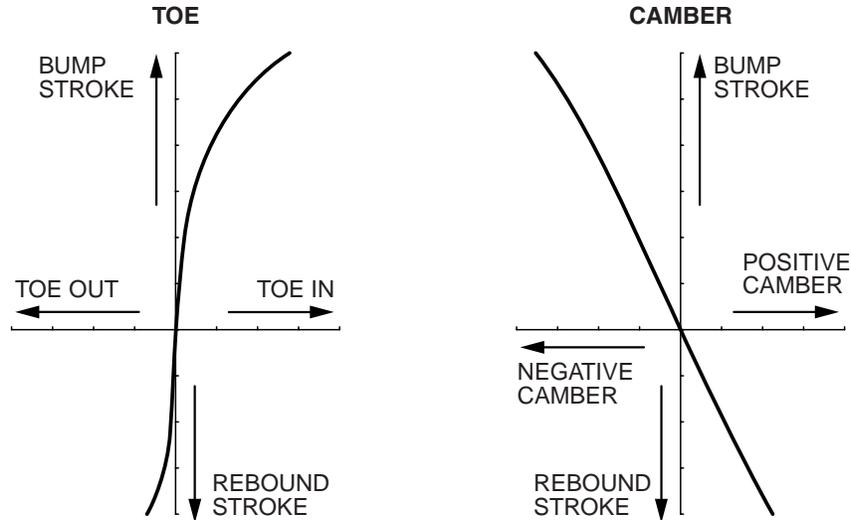

Maintained high rigidity and reduced weight by adopting integrated double cross member.

**ALIGNMENT**

Optimized toe, camber characteristics by using long suspension arm.

## SPECIFICATIONS

### SUSPENSION SYSTEM

ITEM	SPECIFICATION
Suspension method	Low mount multi-link

### WHEEL ALIGNMENT

ITEM	SPECIFICATION
Camber	-0°50'
Toe-in mm (in)	3 (0.12)

### COIL SPRING

ITEM	SPECIFICATION
Wire diameter mm (in)	11.8 (0.46)
Average diameter mm (in)	85.8 – 112.2 (3.38 – 4.42)
Free length mm (in)	330 (13.0)

---
